9510 Remote Airborne Particle Counter

1.0 CFM (28.3 LPM)

Particles Plus® 9510 Remote Airborne Particle Counters monitor particle sizes ranging from 0.5 to 25 µm across six user-selectable channels at a flow rate of 1.0 CFM (28.3 LPM). These instruments are designed for collecting particle data in cleanrooms or other controlled environments, and seamlessly integrate with Particles Plus® Software, facility monitoring systems, or local data collection platforms.

The 9510 supports data reporting in standard cleanroom formats or as mass concentration in µg/m³, with density and refractive index corrections. Optional temperature and relative humidity probes allow integration of three key data points into a single monitoring location.

Standardized hardware and firmware across the Particles Plus® product line streamline maintenance and lower the total cost of ownership. With extensive remote diagnostics and a lifetime warranty, the 9510 delivers reliable performance and long-term value.
